

Phat Box

Beitrag von „Thanandon“ vom 4. Februar 2004 um 11:20

1000 Stunden Music unmöglich??? dann schaut mal hier:

Hit the road with your entire music collection on the PhatNoise® cartridge. Installed like a standard CD changer or power amp, the PhatNoise® comes equipped with a 20GB hard drive that works hand-in-hand with your existing Volkswagen stereo, allowing easy access to your music library. Figure an average of 200 songs per gigabyte, and you're looking at at least 4,000 songs at your fingertips.

Set-up is a breeze: Music Manager® software is included for your PC, which easily converts your CD collection into MP3 or WMA files and allows you to organize the tunes any way you like. The playlists and songs are then downloaded to the PhatNoise®. Controls are the icing on the cake—the PhatNoise® actually speaks the artist, album, genre and playlist info through your speakers, and you use your existing stereo to navigate.

Requirements: PC Windows® 98 2nd Ed.+; Mac OS 9+ with Virtual PC and Windows® 98 2nd Ed. Windows NT does not support USB use. A USB 2.0 card is recommended.

Installation kit required for mounting on passenger side cargo area wall. Some people have successfully mounted the unit into the CD changer bracket.
